GENERATOR

SHORE POWER

⚠
Vehicles and equipment with combustion engines can emit exhaust gases. Exhaust gases may cause carbon monoxide poisoning, which can lead to death or serious injury.
The flammable liquids used in the engine can cause a fire or explosion, which can lead to death or serious injury.
To reduce the risk of fire or explosion, do not smoke while the engine is running.
Do not use open flames or sparks in the vehicle storage area.
Do not use the vehicle as a storage area for flammable or explosive materials.
Do not use the vehicle as a storage area for flammable or explosive materials.
Do not use the vehicle as a storage area for flammable or explosive materials.

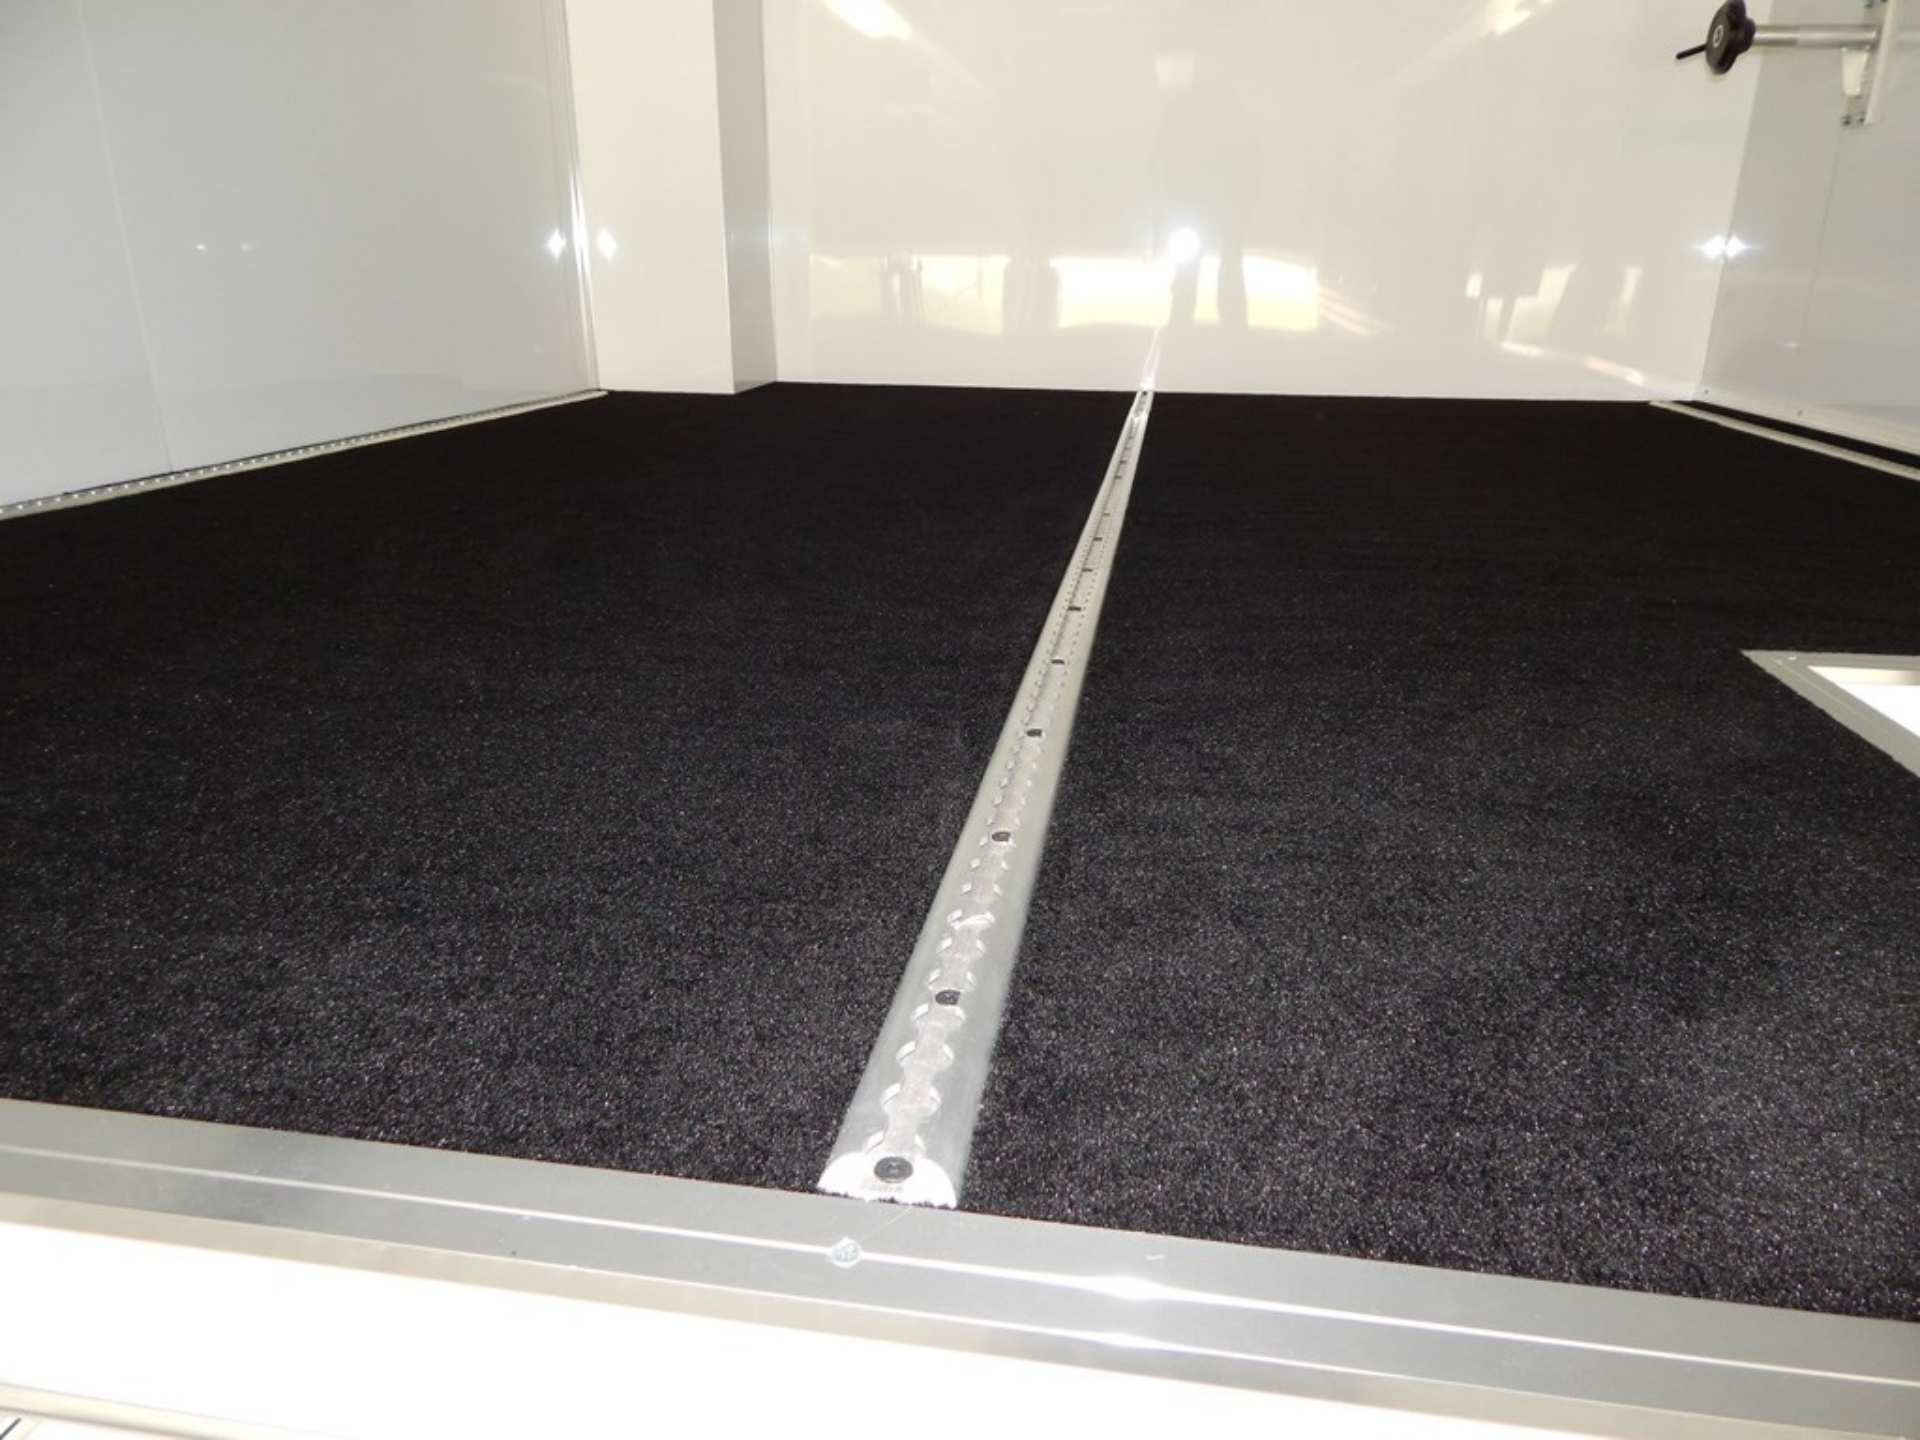

1. Do not use the vehicle storage area when vehicles are present.
2. Do not sleep in the vehicle storage area when vehicles are present.
3. Close doors and windows in walls of separation (if installed) when any vehicle is present.
4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
5. Do not store, transport, or dispense fuel inside this vehicle.
6. Open the windows, openings, or other systems provided for ventilation.

⚠ DANGER
Vehicles and equipment powered by internal combustion engines and placed in recreational vehicles may cause carbon monoxide poisoning or suffocation, which could result in death or serious injury.
The Recreational Vehicle used to power these items will cause a fire or explosion, which can result in death or serious injury.

To reduce risk:

1. Do not use in the vehicle storage area when vehicles are present.
2. Do not sleep in the vehicle storage area when vehicles are present.
3. Close doors and windows in walls of separation or isolation when any vehicles are present.
4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
5. Do not store, transport, or dispense fuel inside this vehicle.
6. Open the windows, openings, or air ventilation systems provided for venting the transportation area after vehicles are present.
7. Do not operate propane appliances, pilot lights, or electrical equipment when motorized vehicles are present.

Batteries should be properly maintained and recharged regularly. Improper use of batteries can cause carbon monoxide poisoning, which could result in death or serious injury. The batteries used to power these items can cause a fire or explosion, which can result in injury.

1. Do not ride in the vehicle storage area when vehicles are present.
2. Do not sleep in the vehicle storage area when vehicles are present.
3. Close doors and windows in walls of separation or restricted when any vehicle is present.
4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
5. Do not store, transport, or dispose fuel inside this vehicle.
6. Open the windows, openings, or air ventilation systems provided for venting the transportation area when vehicles are present.
7. Do not operate propane appliances, pilot lights, or electrical equipment when restricted vehicles are present.

DANGER
This unit is not to be used as a storage cabinet for flammable, volatile, or otherwise hazardous materials. The use of such materials may result in fire, explosion, or other damage to the unit and property. For more information, please refer to the user manual.
