DANGER PINCH POINT

DANGER PINCH POINT

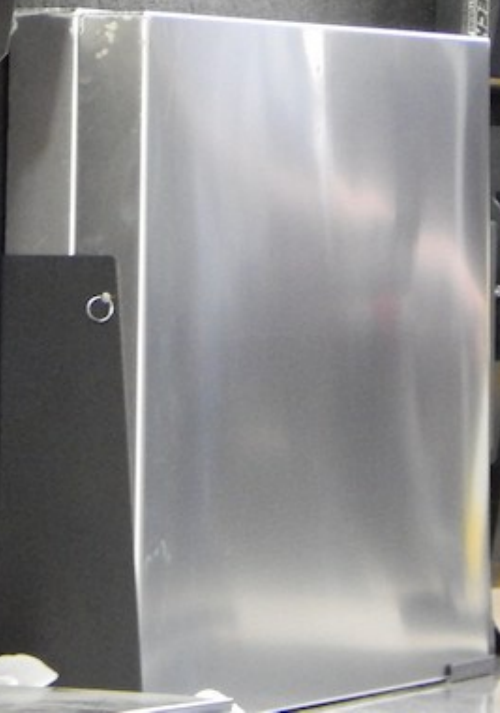

The control panel features a black carbon-fiber textured background. On the left, a silver-bordered panel contains two analog gauges: the left one is labeled 'OIL' and 'PSI' with a scale from 0 to 80; the right one is labeled 'TEMP' and '°F' with a scale from 160 to 240. Below these is a digital display showing '0.0' and 'HOURS' with a GM logo. To the right of the display is a red emergency stop button and a green 'START / STOP' button. The 'POWERTECH GENERATORS' logo is at the bottom left of this panel. To the right of the main panel is a single analog gauge and a brass plate with six toggle switches. A silver key switch is located in the upper right corner of the panel area.

A row of seven toggle switches on a silver metal plate, each with a label above it. The switches are currently in the 'off' position.

A control panel for a generator, featuring two circular gauges at the top. The left gauge is labeled 'OIL' and has a scale from 0 to 75. The right gauge is labeled 'TEMP' and has a scale from 120 to 240. Below the gauges is a digital display labeled 'HOURS' showing '00'. To the right of the display is a red emergency stop button and a 'START / STOP' toggle switch. The panel is mounted on a black textured background and has the 'POWERTECH GENERATORS' logo at the bottom.
